**2014 No. 491**

**CLEAN AIR, ENGLAND**

**The Smoke Control Areas (Authorised Fuels) (England) Regulations 2014**

<i>Made</i>	- - - -	<i>5th March 2014</i>
<i>Laid before Parliament</i>		<i>6th March 2014</i>
<i>Coming into force</i>	- -	<i>6th April 2014</i>

The Secretary of State makes the following Regulations in exercise of the powers conferred by section 20(6) of the Clean Air Act 1993<sup>(1)</sup>.

**Citation, application and commencement**

1. These Regulations—
  - (a) may be cited as the Smoke Control Areas (Authorised Fuels) (England) Regulations 2014;
  - (b) apply in England; and
  - (c) come into force on 6th April 2014.

**Authorised fuels for the purposes of Part 3 of the Clean Air Act 1993**

2. For the purposes of Part 3 of the Clean Air Act 1993, the following are authorised fuels—
  - (a) anthracite;
  - (b) semi-anthracite;
  - (c) electricity;
  - (d) gas;
  - (e) low volatile steam coals; and
  - (f) the fuels described in the Schedule.

**Revocation**

3. The Smoke Control Areas (Authorised Fuels) (England) (No. 2) Regulations 2013<sup>(2)</sup> are revoked.

---

(1) 1993 c.11.  
(2) S.I. 2013/2111.

---

**Status:** *This is the original version (as it was originally made). This item of legislation is currently only available in its original format.*

Department for Environment, Food and Rural  
Affairs

## SCHEDULE

Regulation 2(f)

### Authorised fuels

1. Aimcor Excel briquettes, manufactured by Applied Industrial Materials UK Limited at Newfield, County Durham, or manufactured by Oxbow Carbon & Minerals UK Limited, Windsor House, Cornwall Road, Harrogate, North Yorkshire, which—

- (a) comprise petroleum coke (as to approximately 60 to 75% of the total weight), low volatile coal and reactive coke (as to approximately 20 to 25% of the total weight) and cold-setting resin binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) are unmarked pillow-shaped briquettes;
- (d) have an average weight of 73 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

2. Aimcor Pureheat briquettes, manufactured by Applied Industrial Materials UK Limited at Immingham, North East Lincolnshire, or manufactured by Oxbow Carbon & Minerals UK Limited, Windsor House, Cornwall Road, Harrogate, North Yorkshire, which—

- (a) comprise anthracite (as to approximately 60% of the total weight), petroleum coke (as to approximately 25% of the total weight) and binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 250°C;
- (c) are pillow-shaped briquettes with a single line indentation on one side and a double line indentation on the reverse side;
- (d) have an average weight of 75 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

3. Ancit briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite (as to approximately 60 to 95% of the total weight), petroleum coke (up to approximately 30% of the total weight), bituminous coal (up to approximately 15% of the total weight) and a molasses and phosphoric acid binder or an organic binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
- (c) are unmarked cushion-shaped briquettes;
- (d) have an average weight of 48 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

4. Big K Instant Lighting Fire Logs, manufactured by Allspan BV at Macroweg 4, 5804 CL Venray, the Netherlands, which—

- (a) comprise slack wax (as to approximately 58 to 59% of the total weight) and hardwood sawdust (as to approximately 41 to 42% of the total weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 235 millimetres in length and 80 millimetres in depth, with grooves along their faces;
- (d) have an average weight of 1.1 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.1% of the total weight.

5. Big K Restaurant Grade Charcoal, manufactured by Big K Products UK Limited at Parque Industrial Alvear, 2126 Alvear, Provincia de Santa Fe, Argentina which—
- comprises pyrolised white quebracho wood;
  - was manufactured using a kiln pyrolysis process at approximately 450°C;
  - are unmarked charcoal pieces of between 30 millimetres and 150 millimetres; and
  - has a sulphur content not exceeding 2% of the total weight.
6. Black Diamond Gem briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- comprise anthracite duff (as to 20 to 30% of the total weight), petroleum coke (as to 40 to 45% of the total weight), bituminous coal (as to 12 to 22% of the total weight) and molasses and phosphoric acid binder (as to the remaining weight);
  - were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
  - are pillow-shaped briquettes marked with two parallel indented lines running latitudinally around the briquette;
  - have an average weight of 160 grams per briquette; and
  - have a sulphur content not exceeding 1.5% of the total weight.
7. Bord na Móna Firelogs, manufactured by Bord na Móna Fuels Limited of Newbridge, County Kildare, Ireland, which—
- comprise slack wax (as to approximately 55% of the total weight) and hardwood sawdust (as to approximately 45% of the total weight);
  - were manufactured from those constituents by a process of heat treatment and extrusion;
  - are firelogs that are approximately 255 millimetres in length and 75 millimetres in diameter, with grooves along one longitudinal face;
  - have an average weight of 1.3 kilograms per firelog; and
  - have a sulphur content not exceeding 0.1% of the total weight.
8. Bord na Móna Firepak (also marketed as Arigna Special coal briquettes), manufactured by Bord na Móna Fuels Limited of Newbridge, County Kildare, Ireland, which—
- comprise anthracite (as to approximately 50% of the total weight), petroleum coke (as to approximately 20 to 40% of the total weight), bituminous coal (as to approximately 10 to 30% of the total weight) and starch based binder (as to the remaining weight);
  - were manufactured from those constituents by a process involving roll-pressing and heat treatment;
  - are unmarked pillow-shaped briquettes;
  - have an average weight of 50 grams per briquette; and
  - have a sulphur content not exceeding 1.5% of the total weight.
9. Briteflame briquettes, manufactured by Maxibrite Limited at Mwyndy Industrial Estate, Llantrisant, Mid Glamorgan, South Wales, which—
- comprise bituminous coal (as to approximately 10 to 15% of the total weight), petroleum coke (as to approximately 10 to 15% of the total weight), anthracite duff (as to approximately 70 to 80% of the total weight) and starch binder (as to the remaining weight);
  - were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 260°C;

- (c) are unmarked pillow-shaped briquettes;
  - (d) have an average weight of 140 grams per briquette; and
  - (e) have a sulphur content not exceeding 1.9% sulphur on a dry basis.
- 10.** Briteheat briquettes (also known as Stoveheat Premium briquettes), manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- (a) comprise anthracite (as to approximately 60 to 85% of the total weight), petroleum coke (up to approximately 30% of the total weight), bituminous coal (up to approximately 15% of the total weight) and a molasses and phosphoric acid binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
  - (c) are cushion-shaped briquettes with an indented line running longitudinally around the briquette;
  - (d) have an average weight of 30 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 11.** Briteheat Plus briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- (a) comprise anthracite duff (as to approximately 75% to 95% of the total weight), petroleum coke (up to approximately 20% of the total weight) and an organic binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll pressing;
  - (c) are unmarked pillow shaped briquettes;
  - (d) have an average weight of 80 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 12.** Bryant and May Firelogs, manufactured by Swedish Match at Kostenetz, Bulgaria, which—
- (a) comprise paraffin wax (as to approximately 50% of the total weight), ground poplar wood (as to approximately 25% of the total weight), wheatflour (as to approximately 15% of the total weight), ignitable solids dispersed in gelled paraffin wax (as to approximately 1% of the total weight) and water, swelling agents and preservative (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving extrusion;
  - (c) have a quadrant shaped cross section with a radius of approximately 80 millimetres, a length of approximately 265 millimetres and an ignition strip along one edge;
  - (d) have an approximate weight of 1.15 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 0.1% of the total weight.
- 13.** Charglow briquettes, manufactured by Polchar Spolka z ograniczona odpowiedzialnoscia of Ulica Kuznicka 1, Police, Zachodniepomorskie, Poland, which—
- (a) comprise bituminous coal char (as to approximately 45 to 95% of the total weight), anthracite (as to approximately 0 to 20% of the total weight), petroleum coke (as to approximately 0 to 20% of the total weight), bituminous coal (as to approximately 0 to 10% of the total weight) and an organic binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 110°C;
  - (c) are unmarked pillow-shaped briquettes;
  - (d) have an average weight of 100 grams per briquette; and

- (e) have a sulphur content not exceeding 1.5% of the total weight.
- 14.** Coalite, manufactured by Coalite Products Limited at Bolsover, near Chesterfield, Derbyshire and at Grimethorpe, South Yorkshire using a low temperature carbonisation process.
- 15.** Coalite Ovals, manufactured by Maxibrite Limited at Mwyndy Industrial Estate, Llantrisant, Mid Glamorgan, South Wales, which—
- (a) comprise bituminous coal (as to approximately 10 to 15% of the total weight), petroleum coke (as to approximately 70 to 80% of the total weight), and anthracite duff and starch binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 260 °C;
  - (c) are unmarked pillow-shaped briquettes that are approximately 84 millimetres in length, 38 millimetres in width and 62 millimetres in height;
  - (d) have an average weight of 118 grams per briquette; and
  - (e) have a sulphur content not exceeding 1.9% of the total weight.
- 16.** Coke, manufactured by-
- (a) Coal Products Limited at Cwm Coking Works, Llantwit Fardre, Pontypridd, Rhondda Cynon Taff, and sold as “Sunbrite”;
  - (b) Monckton Coke & Chemical Company Limited at Royston, near Barnsley, South Yorkshire, and sold as “Sunbrite” or “Monckton Boiler Beans”;
  - (c) Corus UK Limited at Teesside Works, Redcar and sold as “Redcar Coke Nuts (Doubles)”;
  - and
  - (d) Coal Products Limited at Cwm Coking Works, Llantwit Fardre, Pontypridd, Rhondda Cynon Taff and sold as “Cwm Coke Doubles”.
- 17.** Cosycoke (also marketed as Lionheart Crusader or Sunbrite Plus), manufactured by Monckton Coke & Chemical Company Limited at Royston, near Barnsley, South Yorkshire, and Aimcor Supercoke (also marketed as Supercoke), manufactured by M & G Fuels Limited at Hartlepool Docks, Hartlepool, which in each case—
- (a) comprise sized hard coke (as to approximately 45 to 65% of the total weight) and sized petroleum coke (as to the remaining weight);
  - (b) were manufactured from those constituents by blending;
  - (c) are unmarked random shapes; and
  - (d) have a sulphur content not exceeding 2% of the total weight.
- 18.** Direct Charcoal Blue Bag Premium Grade Restaurant Charcoal, manufactured by Direct Charcoal at Ekamanzi Road, Dalton, KwaZulu Natal, South Africa which—
- (a) comprises pyrolised Acacia Mercii wood;
  - (b) was manufactured using a kiln pyrolysis process at approximately 420 to 480°C;
  - (c) are unmarked charcoal pieces that are between 30 millimetres to 150 millimetres in length, 30 millimetres to 150 millimetres in width and 30 millimetres to 150 millimetres in height; and
  - (d) has a sulphur content not exceeding 2% of the total weight.
- 19.** Direct Charcoal Blue Bag Restaurant Charcoal, manufactured by Direct Charcoal Limited at Ruta 25, km. 9,5 –Pilar (cp.1629) Buenos Aires, Argentina which—
- (a) comprises pyrolised white Quebracho and Guayacan wood;

- (b) was manufactured using a kiln pyrolysis process at approximately 420 to 480 °C;
- (c) are unmarked charcoal pieces that are between 30 millimetres to 150 millimetres in length, 30 millimetres to 150 millimetres in width and 30 millimetres to 150 millimetres in height; and
- (d) has a sulphur content not exceeding 2% of the total weight.

**20.** Dragonglow briquettes, manufactured by Tower Colliery Limited at Aberdare, Mid Glamorgan, South Wales, which—

- (a) comprise tower duff (as to approximately 95% of the total weight) and a resin based binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving cold cure roll pressing;
- (c) are unmarked pillow-shape briquettes;
- (d) have an average weight of 100 grams per briquette; and
- (e) have a sulphur content not exceeding 1% of the total weight.

**21.** Dragonbrite briquettes, manufactured by Tower Colliery Limited at Aberdare, Mid Glamorgan, South Wales, which—

- (a) comprise tower duff (as to approximately 95% of the total weight) and a resin based binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving cold cure roll pressing;
- (c) are pillow-shaped briquettes marked with the letter “T” on one side;
- (d) have an average weight of 50 grams per briquette; and
- (e) have a sulphur content not exceeding 1% of the total weight.

**22.** Duraflame Firelogs, manufactured by Paramelt BV of Costerstraat 18, PO Box 86, 1700 AB Heerhugowaard, the Netherlands, which—

- (a) comprise mineral-based petroleum wax (as to approximately 55% of the total weight) and ground hardwood fibre (as to approximately 45% of the total weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 320 millimetres in length, 85 millimetres in width and 90 millimetres in height;
- (d) have an average weight of 1.45 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.1% of the total weight.

**23.** Ecoal briquettes (also marketed as Homefire Ecoal briquettes), manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite fines (as to approximately 40 to 65% of the total weight), petroleum coke (as to approximately 20 to 40% of the total weight), char (as to approximately 0 to 10% of the total weight), bituminous coal (as to approximately 0 to 20% of the total weight), biomass (as to approximately 5 to 20% of the total weight) and molasses and phosphoric acid as binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) are unmarked hexagonal briquettes;
- (d) have an average weight of 125 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

**24.** Ecoal 50 briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire which—

- (a) comprise anthracite fines (as to approximately 30 to 55% of the total weight), biomass (as to approximately 25 to 35% of the total weight), petroleum coke (as to approximately 10 to 40% of the total weight), bituminous coal (as to approximately 0 to 5% of the total weight) and natural organic binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing followed by heat treatment at a temperature of approximately 300°C in a controlled, reduced oxygen environment;
  - (c) are hexagonal-shaped briquettes with a single stripe on one side across the flats;
  - (d) have an average weight of 135 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 25.** Ecobrite briquettes, manufactured by Arigna Fuels Limited at Arigna, Carrick-on-Shannon, County Roscommon, Ireland, which—
- (a) comprise anthracite fines (as to approximately 96% of the total weight) and starch as binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 250°C;
  - (c) are unmarked pillow-shaped briquettes in two sizes;
  - (d) have an average weight per briquette of 37 grams in the case of the smaller size and 48 grams in the case of the larger size; and
  - (e) have a sulphur content not exceeding 1.5% of the total weight.
- 26.** EDF fuel briquettes, manufactured by The GreenFactory at the Laboratoire de Chimie Agro-industrielle UMR 1010 INRA/INP-ENSIACET AGROMAT, Site de l'ENIT 47, Avenue D'Azereiz, -BP 1629 65016 Tarbes Cedex, France, which—
- (a) comprise approximately 100 grams of unprocessed Miscanthus (as to approximately 45% of the total weight), approximately 95 grams of Copra ester (as to approximately 43% of the total weight) and approximately 25 grams of a binder produced from Miscanthus (processed with calcium oxide as to approximately 0.5% of the total weight) as to the remaining weight;
  - (b) are manufactured from those constituents by a process involving Miscanthus processing, mixing, hot pressing and soaking in an ester bath;
  - (c) are unmarked cylinder shaped briquettes that are 120 millimetres in height and 60 millimetres in diameter, with a star shaped hole running centrally through the longer length of the briquette;
  - (d) have an average weight of 220 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 27.** Excel+ briquettes, manufactured by Oxbow Coal B.V. at Newfield works, Bishop Auckland, County Durham, which—
- (a) comprise 65% to 70% petroleum coke and 25% anthracite (both by weight) together with a cold setting resin binder, hardener and low temperature stabiliser as to the remaining weight;
  - (b) are produced at ambient temperature by a process involving roll-pressing and cold curing;
  - (c) are unmarked square pillow shaped briquettes;
  - (d) have an average weight per briquette of 100 grams; and
  - (e) have a sulphur content not exceeding 1.9% of the total weight.

**28.** Extracite briquettes, manufactured by Sophia-Jacoba Handelsgesellschaft mbH at Hückelhoven, Germany, which—

- (a) comprise anthracite duff (as to approximately 95.5% of the total weight) and ammonium lignosulphonate lye as binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 260°C;
- (c) are cushion-shaped briquettes with a silvery appearance and are marked with the letters “S” and “J”;
- (d) have an average weight of 40 grams per briquette; and
- (e) have a sulphur content of approximately 1.2% of the total weight.

**29.** Fireglo briquettes, manufactured by Les Combustibles de Normandie at Caen, France, and by La Société Rouennaise de Defumage at Rouen, France, which—

- (a) comprise washed Welsh duffs (as to approximately 92% of the total weight) and coal pitch binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 330°C;
- (c) are ovoids which have three lines on one side and are smooth on the other side;
- (d) have an average weight of 30 grams per briquette; and
- (e) have a sulphur content not exceeding 0.8% of the total weight.

**30.** Homefire briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite fines (as to approximately 40 to 70% of the total weight), petroleum coke (as to approximately 20 to 45% of the total weight), char (as to approximately 0 to 10% of the total weight), bituminous coal (as to approximately 5 to 30% of the total weight) and an organic binder or a molasses and phosphoric acid binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) have a volatile matter content in the finished briquette of neither less than 9 nor more than 15% of the total weight on a dry basis;
- (d) are unmarked hexagonal briquettes;
- (e) have an average weight of 140 grams per briquette; and
- (f) have a sulphur content not exceeding 2% of the total weight.

**31.** Homefire Fire Logs, manufactured by De Lange BV of Rustenburgerweg 3, 1646 WJ Ursem, the Netherlands, which—

- (a) comprise slackwax (as to approximately 50% of the total weight) and sawdust (as to approximately 50% of the total weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 280 millimetres in length, 75 millimetres in width and 75 millimetres in height, with a single groove running along each of the four 280 millimetre length faces;
- (d) have an average weight of 1.1 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.2% of the total weight.

**32.** Homefire Ovals, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite duff (as to approximately 57% of the total weight), petroleum coke (as to approximately 17% of the total weight), bituminous coal (as to approximately 13% of the total weight) and molasses and phosphoric acid as binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
  - (c) are pillow-shaped briquettes with two parallel indented lines running latitudinally around the briquette;
  - (d) have an average weight of 135 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 33.** Homefire Ovals (R), manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- (a) comprise anthracite fines (as to approximately 50 to 75% of the total weight), petroleum coke (as to approximately 20 to 45% of the total weight), bituminous coal (as to approximately 5 to 17% of the total weight) and an organic binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing;
  - (c) are pillow-shaped briquettes with two parallel indented lines running latitudinally around the briquette;
  - (d) have an average weight of 130 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 34.** Hot Drops, manufactured by EU Zeme Limited at Riga, Eksporta Street 15, LV-1045 which—
- (a) comprise crushed anthracite (as to approximately 73% of the total weight), bituminous coal (as to approximately 18% of the total weight) and a molasses and orthophosphoric acid binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing followed by heat treatment at a temperature of approximately 250 to 280°C;
  - (c) are almost round pillow-shaped briquettes that are 40 millimetres in diameter and about 21 millimetres thick at the centre of the briquette;
  - (d) have an average weight of 23 grams per briquette; and
  - (e) have a sulphur content not exceeding 0.5% of the total weight.
- 35.** HouseFuel Smokeless Ovals, manufactured by Maxibrite Limited at Llantrisant, Rhondda Cynon Taf, South Wales, which—
- (a) comprise anthracite fines (as to approximately 84% of the total weight), petroleum coke (as to approximately 12% of the total weight) and starch as binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 260°C;
  - (c) are unmarked pillow-shaped briquettes;
  - (d) have an average weight of 78 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 36.** HouseFuel Smokeless Ovals, manufactured by Maxibrite Limited at Mwyndy Industrial Estate, Llantrisant, Mid Glamorgan, South Wales, which—
- (a) comprise bituminous coal and petroleum coke (each as to approximately 10 to 15% of the total weight) and anthracite duff and starch binder (as to the remaining weight);

- (b) were manufactured from those constituents by a process involving a roll-pressing and heat treatment at about 260°C;
- (c) are unmarked pillow-shaped briquettes not exceeding 68 millimetres in length, 63 millimetres in width and 38 millimetres in height;
- (d) have an average weight of 110 grams per briquette; and
- (e) have a sulphur content not exceeding 1.9% on a dry basis.

**37.** Island Lump and Island Nuts, manufactured by Unocal Refinery of California, the United States of America, which—

- (a) comprise petroleum coke;
- (b) were manufactured from the petroleum coke by a process involving heat treatment and steam injection;
- (c) are unmarked random shapes;
- (d) have an average weight of 80 grams (per briquette of Island Lump) or 30 grams (per briquette of Island Nuts); and
- (e) have a sulphur content not exceeding 2% of the total weight.

**38.** Jewel briquettes, manufactured by Eldon Colliery Limited at Newfield Works, Bishop Auckland, County Durham, which—

- (a) comprise anthracite (as to approximately 30 to 50% of the total weight), Long Beach petroleum coke (as to approximately 50 to 70% of the total weight) and a carbohydrate binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 150°C;
- (c) are unmarked pillow-shaped briquettes;
- (d) have an average weight of 33 grams per briquette; and
- (e) have a sulphur content not exceeding 1.5% of the total weight.

**39.** La Hacienda Easy Logs, manufactured by Allspan BV at Macroweg 4, 5804 CL Venray, the Netherlands, which meet the conditions specified for Big K Instant Lighting Fire Logs at paragraph 4.

**40.** Long Beach Lump nuts (otherwise known as LBL nuts), manufactured by Aimcor Carbon Corporation at Long Beach, California, the United States of America, or manufactured by Oxbow Carbon & Minerals LLC, 330 Golden Shore, Suite 210, Long Beach, California 90802, the United States of America, which—

- (a) comprise petroleum coke (as to approximately 85 to 100% of the total weight), limestone (as to approximately 0 to 10% of the total weight) and coal tar pitch (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving heat treatment and steam injection;
- (c) are unmarked random shapes; and
- (d) have a sulphur content not exceeding 2% of the total weight.

**41.** Maxibrite briquettes, manufactured by Maxibrite Limited at Llantrisant, Rhondda Cynon Taf, South Wales, which—

- (a) comprise anthracite fines (as to approximately 84% of the total weight), petroleum coke (as to approximately 12% of the total weight) and starch as binder (as to the remaining weight);

- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at 250°C;
  - (c) are cushion-shaped briquettes marked with the letter “M”;
  - (d) have an average weight of 35 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 42.** Multiheat briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- (a) comprise anthracite (as to approximately 60 to 80% of the total weight), petroleum coke (as to approximately 10 to 30% of the total weight) and a molasses and phosphoric acid binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
  - (c) are unmarked pillow-shaped briquettes;
  - (d) have average weights per briquette of either 55 or 80 grams; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 43.** Newburn briquettes, manufactured by ECL Mineral Processing Limited of Newfield Works, Newfield, Bishop Auckland, County Durham which—
- (a) comprise petroleum coke (as to approximately 56 to 57% of the total weight), anthracite (as to approximately 37 to 38% of the total weight), and a dry powder binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a cold cure process using a roller press;
  - (c) are unmarked pillow-shaped briquettes that are 70 millimetres in length, 62 millimetres in width and 42 millimetres in height;
  - (d) have an average weight of 110 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 44.** Newflame briquettes, manufactured by Maxibrite Limited at Llantrisant, Rhondda Cynon Taf, South Wales, which—
- (a) comprise anthracite fines (as to approximately 84% of the total weight), petroleum coke (as to approximately 12% of the total weight) and starch as binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 260°C;
  - (c) are unmarked pillow-shaped briquettes;
  - (d) have an average weight of 78 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 45.** Newflame Plus briquettes, manufactured by Maxibrite Limited at Mwyndy Industrial Estate, Llantrisant, Mid Glamorgan, which—
- (a) comprise bituminous coal and petroleum coke (each as to approximately 10 to 15% of the total weight) and anthracite duff and starch binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving a roll-pressing and heat treatment at about 260°C;
  - (c) are unmarked pillow-shaped briquettes that are approximately 68 millimetres in length, 63 millimetres in width and 38 millimetres in height;

- (d) have an average weight of 110 grams per briquette; and
  - (e) have a sulphur content not exceeding 1.9% on a dry basis.
- 46.** Newheat briquettes, manufactured for Oxbow Coal B.V at Newfield works, Bishop Auckland, County Durham, which—
- (a) comprise petroleum coke (as to approximately 60 to 65% of the total weight) and anthracite (as to approximately 30 to 35% of the total weight) together with a cold setting resin binder, hardener and low temperature stabiliser (as to the remaining weight);
  - (b) are produced at ambient temperature by a process involving roll-pressing and cold curing;
  - (c) are unmarked pillow-shaped oval briquettes;
  - (d) have an average weight of 100 grams per briquette; and
  - (e) have a sulphur content not exceeding 1.9% of the total weight.
- 47.** Optima Fire Logs, manufactured by Allspan BV at Macroweg 4, 5804 CL Venray, the Netherlands, which meet the conditions specified for Big K Instant Lighting Fire Logs at paragraph 4.
- 48.** Phurnacite briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—
- (a) comprise anthracite duff (as to approximately 65 to 85% of the total weight), petroleum coke (as to approximately 20% of the total weight) and a molasses and phosphoric acid binder (as to the remaining weight);
  - (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
  - (c) are ovoid-shaped briquettes with two parallel indented lines running longitudinally around the briquette;
  - (d) have an average weight of 40 grams per briquette; and
  - (e) have a sulphur content not exceeding 2% of the total weight.
- 49.** Pyrobloc Fire Logs, manufactured by Allspan BV at Macroweg 4, 5804 CL Venray, the Netherlands, which—
- (a) comprise slack wax (as to approximately 58 to 59% of the total weight) and hardwood sawdust (as to approximately 41 to 42% of the total weight);
  - (b) were manufactured from those constituents by a process of heat treatment and extrusion;
  - (c) are firelogs that are approximately 265 millimetres in length and 80 millimetres in depth, with grooves along their faces;
  - (d) have an average weight of 1.3 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 0.1% of the total weight.
- 50.** Safelight Firelogs, manufactured by Advanced Natural Fuels Limited at Pocklington, East Riding of Yorkshire, which—
- (a) comprise woodchip (as to approximately 40 to 55% of the total weight) and Palm Wax binder (as to approximately 45 to 60% of the total weight);
  - (b) were manufactured from those constituents by a process involving pressing of the mixed ingredients at about 40°C to 50°C;
  - (c) are rectangular hard finish firelogs with two deep overlapping slots in the top surface and a single continuous slot in the base surface;
  - (d) have an average weight of 1.8 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 2% of the total weight.

**51.** Sovereign briquettes, manufactured by Monckton Coke & Chemical Company Limited at Royston, near Barnsley, South Yorkshire, which—

- (a) comprise anthracite (as to approximately 75% of the total weight), coal and reactive coke (as to approximately 21% of the total weight) and cold-setting resin binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving extrusion;
- (c) are unmarked hexagonal briquettes;
- (d) have an average weight of 130 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

**52.** Supabrite Coke Doubles, manufactured by HJ Banks and Company Limited at Inkerman Road Depot, Tow Law, County Durham, which—

- (a) comprise metallurgical coke (as to approximately 40 to 60% of the total weight) and petroleum coke (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving blending and screening;
- (c) are unmarked random shapes; and
- (d) have a sulphur content not exceeding 1.95% of the total weight.

**53.** Supacite briquettes, manufactured by Maxibrite Limited at Llantrisant, Rhondda Cynon Taf, South Wales, which—

- (a) comprise anthracite fines (as to approximately 84% of the total weight), petroleum coke (as to approximately 12% of the total weight) and starch as binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 240°C;
- (c) are unmarked ovoids;
- (d) have an average weight of 45 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

**54.** Supertherm briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise a blend (in the proportion of 19:1 by weight) of anthracite and medium volatile coal (as to approximately 93% of the total weight) and cold-setting organic binder or a molasses and phosphoric acid binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) are unmarked ovoids;
- (d) have an average weight of 160 grams per briquette; and
- (e) have a sulphur content not exceeding 1.5% of the total weight.

**55.** Supertherm II briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite (as to approximately 36 to 51% of the total weight), petroleum coke (as to approximately 40 to 55% of the total weight) and an organic binder or a molasses and phosphoric acid binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) are unmarked ovoids;
- (d) have an average weight of 140 grams per briquette; and

(e) have a sulphur content not exceeding 2% of the total weight.

**56.** Taybrite briquettes (otherwise known as Surefire briquettes), manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite (as to approximately 60 to 80% of the total weight), petroleum coke (as to approximately 10 to 30% of the total weight) and a molasses and phosphoric acid binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at about 300°C;
- (c) are pillow-shaped briquettes marked with a single indented line running longitudinally along each face, off-set from its counterpart by 10 millimetres or unmarked;
- (d) have an average weight of 80 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

**57.** Therma Briquettes, manufactured by Maxibrite Limited at Llantrisant, Rhondda Cynon Taf, South Wales, which—

- (a) comprise anthracite fines (as to approximately 84% of the total weight), petroleum coke (as to approximately 12% of the total weight) and starch as binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing and heat treatment at 250°C;
- (c) are oval or tear shaped briquettes with a line through the centre;
- (d) have an average weight of 26 grams per briquette; and
- (e) have a sulphur content not exceeding 2% of the total weight.

**58.** Thermac briquettes, manufactured by Coal Products Limited at Immingham Briquetting Works, Immingham, North East Lincolnshire, which—

- (a) comprise anthracite (as to approximately 90% of the total weight) and cold-setting organic binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process involving roll-pressing;
- (c) are unmarked pillow-shaped briquettes;
- (d) have an average weight of 48 grams per briquette; and
- (e) have a sulphur content not exceeding 1.5% of the total weight.

**59.** Tiger Tim Firelogs, manufactured by De Lange BV of Rustenburgerweg 3, 1646 WJ Ursem, the Netherlands, which—

- (a) comprise slackwax (as to approximately 50% of the total weight) and sawdust (as to approximately 50% of the total weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 280 millimetres in length, 75 millimetres in width and 75 millimetres in height, with a single groove running along each of the four 280 millimetre length faces;
- (d) have an average weight of 1.1 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.2% of the total weight.

**60.** Unicite, manufactured by DJ Davies Fuels Ltd at Blaenau Fuel Depot, Ammanford, Carmarthenshire, or manufactured by AI Simson at Cabby Latch, Logie by Kirriemuir, Angus, which—

- (a) is a mixture of the following separate fuels—
  - (i) anthracite large nuts, and
  - (ii) Union briquettes of the description in sub-paragraph (c) manufactured by RWE Power A.G. at Cologne, Germany (as to no more than approximately 40 to 42% of Unicite's total weight);
- (b) has an overall sulphur content not exceeding 0.5% of the total weight; and
- (c) in so far as it is constituted by the Union briquettes referred to in sub-paragraph (a) (ii), consists of compressed lignite with each briquette measuring approximately 75 millimetres in width, 60 millimetres in height and 55 millimetres in thickness.

**61.** ZIP 100% Natural Firelog, manufactured by Standard Brands (Trading) Ireland Ltd at Castlebellingham, County Louth, Ireland, which—

- (a) comprise naturally derived hydrogenated triglyceride waxes (as to approximately 53 to 57% of the total weight), willow fibre (as to approximately 23 to 27% of the total weight) and natural molasses based binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 210 millimetres in length, 80 millimetres in width and 75 millimetres in height;
- (d) have an average weight of between 1.085 and 1.115 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.2 per cent of the total weight.

**62.** ZIP 100% Natural Firelogs manufactured by Standard Brands (Trading) Ireland Ltd of Castlebellingham, County Louth, Ireland, which—

- (a) comprise naturally derived hydrogenated triglyceride waxes (as to approximately 53 to 57% of the total weight), willow fibre (as to approximately 23 to 27% of the total weight) and natural molasses based binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs approximately 245 millimetres in length, 75 millimetres in width and 68 millimetres in height;
- (d) have an average weight of between 0.985 and 1.015 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.2 per cent of the total weight.

**63.** ZIP 100% Natural Stove Log, manufactured by Standard Brands (Trading) Ireland Ltd at Castlebellingham, County Louth, Ireland, which—

- (a) comprise naturally derived hydrogenated triglyceride waxes (as to approximately 53 to 57% of the total weight), willow fibre (as to approximately 23 to 27% of the total weight) and natural molasses-based binder (as to the remaining weight);
- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
- (c) are firelogs that are approximately 165 millimetres in length, 80 millimetres in width and 75 millimetres in height;
- (d) have an average weight of between 0.835 and 0.865 kilograms per firelog; and
- (e) have a sulphur content not exceeding 0.2% of the total weight.

**64.** ZIP Cracklelog firelogs, ZIP Crackle-log firelogs and ZIP Crackling Log firelogs, manufactured by Allspan BV of Macroweg 4, 5804 CL Venray, the Netherlands, which—

- (a) comprise slack wax (as to approximately 55% of the total weight), hardwood sawdust (as to approximately 42% of the total weight) and crackle seeds (as to approximately 3.2% of the total weight);

- (b) were manufactured from those constituents by a process of heat treatment and extrusion;
  - (c) are firelogs that are approximately 235 millimetres in length and 80 millimetres in diameter, with grooves along the faces;
  - (d) have an average weight of 1.1 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 0.1% of the total weight.
- 65.** ZIP Firelogs, manufactured by Allspan BV of Macroweg 4, 5804 CL Venray, the Netherlands, which—
- (a) comprise slack wax (as to approximately 58 to 59% of the total weight) and hardwood sawdust (as to approximately 41 to 42% of the total weight);
  - (b) were manufactured from those constituents by a process of heat treatment and extrusion;
  - (c) are firelogs that are approximately 265 millimetres in length and 80 millimetres in depth, with grooves along the faces;
  - (d) have an average weight of 1.3 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 0.1% of the total weight.
- 66.** ZIP Firelogs, manufactured by Woodflame Moerdijk BV of Appolloweg 4, Harbour No: M189A, 4782 SB Moerdijk, the Netherlands, which—
- (a) comprise slack wax (as to approximately 55 to 60% of the total weight) and hardwood sawdust (as to approximately 40 to 45% of the total weight);
  - (b) were manufactured from those constituents by a process of heat treatment and extrusion;
  - (c) are firelogs that are approximately 255 millimetres in length and 75 millimetres in diameter, with grooves along one longitudinal face;
  - (d) have an average weight of 1.3 kilograms per firelog; and
  - (e) have a sulphur content not exceeding 0.1% of the total weight.
- 67.** Zip Firelogs, manufactured by Allspan BV at Macroweg 4, 5804 CL Venray, the Netherlands, which meet the conditions specified for Big K Instant Lighting Fire Logs at paragraph 4.

---

## EXPLANATORY NOTE

*(This note is not part of the Regulations)*

These Regulations revoke and replace with amendments the Smoke Control Areas (Authorised Fuels) (England) (No. 2) Regulations 2013 ([S.I. 2013/2111](#)).

These Regulations list authorised fuels for the purposes of Part 3 of the Clean Air Act 1993. Four additional fuels are authorised and have been inserted into the Schedule in paragraphs 18, 19, 35 and 36.

A full impact assessment has not been produced as no impact on the private, voluntary or public sectors is foreseen.
